April 13, 2018

Dear Sustainable Jersey:

Gabel Associates, an Energy Consultant duly registered with the New Jersey Board of Public Utilities, has administered a competitive public bid process for the Readington Public School District for the installation of a solar PV system at the Holland Brook School. The School District entered into a fifteen (15) year Power Purchase Agreement (PPA) with Ameresco to reduce the School Districts cost of electricity. The PPA terms are $0.06799/kWh, with an annual rate escalator of 1.99%.

This letter is to certify that the following solar PV system has been installed at the school and serves only this school:

641.52 kW DC, Ground Mount
492 kW AC

The first year estimated solar production from the array is expected to be 830,121 kWh. The school's energy usage, during a 12-month period from the RFP was 1,299,497 kWh. This represents that solar will provide 64% of the school's electric usage

The system received Permission to Operate (PTO) from the utility on February 26, 2018.

Thank you,

Jason M. Bohm
Business Administrator
Readington Public School District
