Sessions for Early Childhood Educators

(Preschool & Kindergarten)

Matthew Johnson

Gross Motor Time To Learn

This session will focus on games and activities that will allow students to move and play while learning. This session is geared for the preschool program, although several of the activities can be adapted to older students.
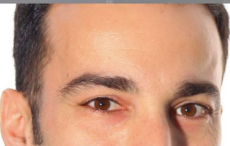

Ana Rugo &

Kimberly Walker

Student Collaboration in Theme Planning

This session will demonstrate how our students can become active participants in the theme planning process. Teachers and students will work collaboratively in developing the roles and props needed in each center. This hands-on activity will allow students to increase their critical thinking skills and take ownership in the theme planning process.

To Infinity & Beyond: Integrating Science Through Literacy & Math Activities

Tracy Cistaro & Elizabeth Lundberg

Using Data to Support Instructional Decision Making

This session will review the various ways of collecting data in a natural context of the school day. We will then discuss how to interpret the data to support instructional decision making in order to meet the individual learning needs of all students.
