

Long Branch Public Schools

Sustainability Policy

<https://www.longbranch.k12.nj.us/lbps>

The screenshot shows the Long Branch Public Schools website. The header includes the district name, a search bar, and navigation links for Home, Events, Athletics, Food Service, and Connect. The main navigation bar highlights the Board of Education section. On the left, a sidebar lists various Board of Education documents. The main content area contains a statement from the Board of Education regarding administrative regulations, followed by a link to the Bylaws, Policies, and Regulations for the Board of Education. The footer includes contact information and a Blackboard logo.

District Policy

7461- DISTRICT SUSTAINABILITY POLICY

Section: Property
Date Created: January, 2018
Date Edited: January, 2018

Sustainability is defined as meeting the needs of the present without compromising the ability of future generations to meet their own needs. It considers the interrelationship of economic, social, and environmental factors that protect and enhance present and future quality of life.

The Board of Education desires to conduct its operations and make decisions with identified **sustainability** priorities that include at a minimum: protecting students, staff, and community from environmental harm; preparing students for the future by educating for **sustainability** (knowledge of concepts and practices of environmental, social, and economic responsibility and **sustainability**); and include an intent to preserve current and future resources.

The Board believes by incorporating sustainable practices into school policies and operations it can make an immediate impact on student health, academic performance, and teacher retention while decreasing operational costs and demands on natural resources.

The Superintendent of Schools will establish a School District **Sustainability** Committee/District Green Team to provide the Superintendent and the Board with information on the benefits of increased **sustainability** practices within the school district.

The Board wants to protect students, staff, school visitors, and community members from environmental harm and will strive to eliminate the use of potentially toxic and harmful substances; prepare students for the future by providing a high-quality education that support concepts and practices of environmental, social, and economic responsibility and **sustainability**; and preserving current and future resources by adopting practices in operations that balance environmental, social, and fiscal responsibility to protect and enhance the future quality of life.

The Board of Education authorizes the following **sustainability** practices to be implemented within the schools of the district:
