# 12%

Of Surveyed **Students** (n) Report that They Are Unable to Connect to  
Learning Resources Offsite (n=454)

## Plan:

As with all surveys, the instrument itself can influence the results received. Especially with technology surveys, the use of terms can create confusion.

To ensure efficient and appropriate use of resources, a modified version of this survey will be created and administered.

It will be important to find the buildings and groups that are most affected by limited access and explore solutions to remediate.
