We have 206 bones in our body.

Our bones help us move. They also provide structure.

Our bones protect our organs.(stomach, heart, intestines, lungs)

bones

protect.

How do our bones grow?

Our bones grow by eating the right foods. Foods with calcium help our bones become strong.

Our bones will grow over time. When we turn 25 years old, our bones will be fully grown.

Our bones will strengthen by doing activities such as running, playing sports, exercising, or dancing.

The image shows a Zoom meeting interface on a Samsung laptop. The main window displays a presentation slide about Vitamin D. The slide features a woman speaking in front of a green wall and a white shelving unit with colorful bins. The text on the slide reads: "Vitamin D keeps the immune system healthy and fights infections." and "Inadequate vitamin D increases risk of cardiovascular disease, high blood pressure, and various autoimmune diseases." The Zoom interface includes a top bar with the text "You are viewing Rich Rickitano's screen" and a list of participants: Isabella GomesFerreira, Bruno Mendes, Vinicius reeeeeeeeeeeeee, and Tania. The bottom bar shows the Zoom logo, a chat icon, and system icons for Chrome, a calendar, and the time 10:47.

Vitamin D keeps the immune system healthy and fights infections.

Inadequate vitamin D increases risk of cardiovascular disease, high blood pressure, and various autoimmune diseases.

Zoom interface details:

- Top bar: You are viewing Rich Rickitano's screen
- Participants: Isabella GomesFerreira, Bruno Mendes, Vinicius reeeeeeeeeeeeee, Tania
- Bottom bar: Zoom logo, chat icon, system icons, US, 10:47
